An Introduction to Tile Shapes

Thank you for taking the time to read this introduction to Tile Shapes.

At Tile Shapes we have concentrated exclusively on Ceramic Tiles with great success for over 30 years. Our company is well established in retailing, contract specifications, contracting and distribution.

Our tiles are personally selected for their style, quality and price - imported from some of the biggest and best Italian and Spanish factories. We currently hold over £1million worth of stock in our purpose-built warehouse in Hemel Hempstead.

We supply our own ranges of imported Continental tiles to building developers and contractors throughout the United Kingdom. Our ranges can be seen on display in our designer showroom – within easy reach of the M1 and M25. We can also source specialist ranges direct from our suppliers to satisfy any individual design requirements.

Our contracting department works with new housing developers and contractors throughout the Home Counties. We have an enviable reputation for our professionalism in providing an extremely efficient service, in particular where customer choices are involved and last minute alterations are necessary.

Our in-house design service will not only recommend suitable tiles but can also help customers create the overall look that they are hoping to achieve.

The following pages show the range of products on display in our showroom.
